

Assignment 1

Create 3 pages:

- index.html
- about.html
- contact.html

The should be a shared header for these.

```
<header> </header>
```

The header should include a `<nav> </nav>` with navigating between the three html pages.

The navigation is anchor tags:

```
<a href="/about.html">Go to about!</a>
```

The links are often placed as list items (` `) in an unordered list (` `).

Create it in index.html, and once completed copy and paste it to the other two. Remeber that some links has to be corrected

Each site should have a main heading.

Try styling the heading, so that it removes the default styling for anchor-tags and lists.
